

BOSE® SoundTouch™ Module Now Available on the Compass Control®

 SoundTouch™

BOSE® SoundTouch™ products are now compatible with the Compass Control® System, the first fully integrated major control system built from the ground up to use iOS & Android devices – as its backbone.

Compass Control® now offers integrators a plug-and-play solution with a BOSE® SoundTouch™ module consisting of a bi-directional driver and a pre-configured GUI template. This module will provide customers with easy access to music playback controls and SoundTouch presets all in one elegant interface. Using the Compass Control® app, BOSE® users have access to key features and incredible sound quality they enjoy from their BOSE® SoundTouch™ devices, while having access to an integrated control system with additional video, climate, security, and automation controls.

Module Features:

- › Select Music from the six programmable presets
- › Now Playing information with album art
- › Access to system settings, such as Bass level control
- › Audio Playback Controls
- › IP Control
