

HEOS™ by Denon® Module Now Available on the Compass Control®

HEOS™ by Denon® Multi-Room Wireless Music System is now compatible with the Compass Control® System, the first fully integrated major control system built from the ground up to use iOS & Android devices – as its backbone.

Key Digital has developed a driver and a pre-configured GUI template for their Compass Control® system to interface with HEOS™ by Denon Multi-Room Wireless Music System. Compass Control® system provides HEOS users with iOS/Android access to a complete wireless music system, allowing them to listen, stream and control music effortlessly from anywhere in their home, while having an integrated control system under their fingertips with additional video, lighting, climate, security, and automation controls.

Module Features:

- › Full Bi-Directional Driver Control over IP
- › Now Playing Information Available
- › Full Zone, Playback, and Audio Control
- › Ability to choose music from supported HEOS Music Services
- › Control Multiple Devices with only 1 connection to 1 HEOS Device
