Key Digital Announces Compass Control Pro
Partner Alliance with Autonomic

MOUNT VERNON, NY – October 20, 2017–. Key Digital, an award winning (CES, CEDIA, InfoComm, NAHB) developer and manufacturer of leading-edge technology for HDTV applications, has announced that Autonomic Media Servers and Digital Amplifiers are now compatible with the Compass Control System, the first fully integrated major control system built from the ground up to use Apple's iOS devices – iPad®, iPad mini®, iPhone®, and iPod touch® – as its backbone.

Key Digital has developed a driver and a pre-configured GUI template for their Compass Control® system to interface with Autonomic Media Servers and Digital Amplifiers. These products and profiles are rigorously tested by Key Digital. The Autonomic Media Server driver will allow for IP control, browse music on local server, browse internet radio such as Pandora, and control queue. The Autonomic Digital Amplifier driver will allow for RS control, audio EQ Control, output volume and mute control, and source selection.

Compass Control® users will be able to use their Autonomic Media Servers and Digital Amplifiers with their Compass Control® app. The Autonomic MMS-5A and MMS-2A Media Servers are engineered exclusively for custom integration; the world's first cloud-based media server connects music lovers to the greatest selection and highest quality of content. Sync, schedule, control and distribute multiple streams of audio to all zones and locations.

The Mirage M-400 and M-800 digital amplifiers have been engineered specifically to increase the versatility of our award winning Mirage Media Servers by adding whole home amplification. Combining these products with one of our world class audio servers creates the all new Mirage Audio System. When paired with a Mirage Media Server, this audiophile grade music distribution system will support local music libraries and the most popular streaming services including Pandora, Rhapsody, Spotify, SiriusXM, Slacker Radio, TuneIn, all intuitively can be controlled using the Compass Control app.

"Resulting from cooperative efforts between Key Digital and Autonomic, the integration of its Media Servers and Digital Amplifiers within the Compass Control environment represents a powerful and user-friendly comprehensive solution delivering iOS-based control and entertainment functionality," stated Key Digital's COO, Michael Lakhter. "The Compass Alliance Partners have come together to create a system that has full driver integration already completed, increasing efficiency for integrators," Lakhter concluded.

About Key Digital®

Led by the "Father of DVD", Mike Tsinberg, Key Digital® is an InfoComm, CEDIA, CES, and NAHB award winning manufacturer of professional distributed video and control system equipment.

Since 1999, Key Digital has lead the constantly evolving A/V industry by designing products that deliver industry leading quality, performance, and reliability to corporate, bar & restaurant, digital signage, education, government, and house of worship applications.

Key Digital products are designed and engineered in-house in Mount Vernon, NY. Superior quality, ease-of-installation, and versatility are the result of strenuous research, development, and testing. Expertise and unparalleled knowledge have created a unique hardware-software suite solution ideal for the consultants, designers, and installation firms of the A/V industry. Key Digital® is known to deliver best-in-class products based on quality, performance, and reliability.
